

An Amazing Book

This wonderful work marks the culmination of years of study and research into the thought and philosophy which, while rooted in the ancient Number Symbolism of the Greek and Hebrew Qabalists, has been synthesized in the light of Oriental and Occult experience.

In it new ideas are put forward that challenge the best thought of modern students.

The Anatomy of The Body of God

By FRATER ACHAD

Brings us appreciably nearer to the comprehension of the One thought of God which is the Universe itself. The old static symbolism of the Qabalistic Tree of Life is beheld as dynamic. The Formative Designs of the Great Architect of the Universe unfold themselves before our eyes.

Students, teachers, Occidentalists and Orientalists, as well as laymen, all will find this a mine of treasure thought. Colour and black and white plates, together with forty illustrative diagrams, reveal new motifs of symbolism for architects and Free Masons. Edition limited to 228 signed copies.

Price \$15.00 Post Paid
