

A book review by Aleister Crowley from the September 1917 edition of The International.

Spirit Intercourse, Its Theory and Practice by J. Hewat McKenzie. Mitchell Kennerley, 1917.

I have never read such nauseating twaddle as this book. The author is so ignorant, so impudently ignorant, that he even claims ordinary vaudeville performances as operated by spiritual means! There is also a great deal of disgusting nonsense about the frightful things that happen to you after death if you lead a normal healthy life on earth.
