THE BOOK CORNER

Boni & Liveright announce the immediate publication of a new and completely revised edition of *The Mystic Rose* by Aleister Crowley. This classic in anthropology has been out of print for a number of years. Mr. Crowley is now making a revision of his text to meet the demands of recent research and study. This work has ranked with Westermarck's *History of Human Marriage*, as a great contribution to social anthropology.

The author of this announcement obviously confused "Aleister Crowley" with the actual author of *The Mystic Rose*, Alfred Ernest Crowley.
