

## Do what thou wilt shall be the whole of the Law

The world is stricken to-day by an epidemic of madness. On every side we are confronted by evidence of insanity which is sweeping across the earth like a pestilence.

Murder and terror in Soviet Russia ; Concentration Camps and persecution in Germany ; war fever and blood lust in Italy and Japan ; civil war in Spain ; economic crisis in U. S. A. : recurrent strikes and labour discontent in France—there is no corner of the Globe untouched !

What is the cause ?

The old standards of human conduct, the ancient religions which have served humanity for thousands of years, have broken down.

Christianity, Buddhism, Mahomedanism, Judaism, Confucianism, Shintoism—all these are dead of disbelief. That marks the onward march of Science, the change in value of both time and space.

The old order has broken down, and mankind is searching frantically for a formula which will take its place—a standard of human conduct independent of tradition and dogma which will stand up to the stress of modern conditions, and create a new engine for the further progress of mankind.

The Bible, the Koran and other codes are proving incapable of resisting the shattering effect of modern thought ; humanity is drifting rudderless through a stormy sea of doubt and despair. Belief is bewildered. Conviction is shaken. But there is a way out !

A universal law for all nations, classes and races is here. It is the Charter of Universal Freedom.

“The Law of Thelema,” revealed in Cairo in 1904, has come to replace the outworn creeds, the local codes ; to help the peoples of the world to march on to a new era of peace and happiness.

Its power has been made evident time after time. On three occasions its publication has been followed by disaster—catastrophes to awaken mankind to its message. For the fourth time the Law of Thelema has been published.

The Law is valid for each individual as for the world in general. It is in the power of everyone to accept it, to pass on the message. Its acceptance gives understanding and mastery of self : the power to guide one's fellow-men.

The prospectus following gives particulars of the book “The Equinox of the Gods” which contains in facsimile the manuscript of the “Book of the Law” of Thelema, and an account of how it came into existence.

You cannot afford to neglect the powerful message which it propounds, and the guidance it gives for your future and the future of the world.
