

ABNORMAL PSYCHOLOGY. By ISADOR H. CORIAT, M.D.

"Stage fright is also a condition of pathological fear." To such a degree of absurdity can specialization bring an unbalanced mind. Fear is only pathological when it has no reasonable basis.

This is enough to show the worthlessness of this ill-written book.

It is amusing to find the author quoting Mrs. Verral as conclusive proof against any supernormal element in automatic writing, while Mr. Hill quotes the same experiments as conclusive proof for it. But Mr. Hill is a student of science; Dr. Coriat a flatulent gastrologian.
